ACCESSIBLE PORT**

Provides a Valuable  
Community Service

**WORKS UP TO 3  
DAYS WITHOUT SUN**

Enjoying the great  
outdoors longer.

# POWER UP ON THE GO

## Sun Charge Today

As mobile devices become ubiquitous; batteries get slimmer, screens get bigger, chips get faster and keeping your devices charged presents a significant challenge when outside away from an outlet.

Solar charging stations allow users to keep their handheld devices powered, even when electrical outlets aren't available. Our solar charging systems can help provide a valuable public service to communities and become assets in green sustainability plans.

We've developed a line of innovative solar charging systems to meet real world applications. Best of all, there's no need for the costly installation of electrical conduit. In fact, our chargers can be installed the same day you take it out of the shipping box.

All solar benches and stations utilize intelligent device recognition and include a four-stage battery management controller that ensures maximum energy absorption and load distribution.

Our solar powered charging stations provide quick USB connection, reliable and 100% green charging solutions.

- Great for sports fields & spectator events.
- Offer faculty & students a way to charge their handheld devices on campus.
- Install on park trails so hikers can enjoy the grounds longer. Campers too!
- Parks & Recreation managers can offer a valuable public service with cost effective always on solar technology.
- Place at bus stops so riders can recharge while awaiting their next bus.
- Recreation Centers can offer added amenities to outdoor courses.
- Employees can plug in their laptops outside on company outdoor spaces.
- Energize Street Festivals & outdoor events with the Power of the Sun.

### SUN RAY URBAN SOLAR BENCH

A contemporary bench with classic city style, the Sun Ray Urban Charging Bench keeps users connected with a sleek, low profile solar panel. Perfect for university campuses, trails, bus stops & parks.

# SOLAR BENCHES

### SUN RAY METRO SOLAR BENCH

Inspired by Main Street USA, its design incorporates a classic park bench profile, but upgraded with 21st century solar technology. Now, *recharging your battery*, takes on a whole new meaning.

### SUN RAY SKYLIFT SOLAR BENCH

Great alone or grouped in doubles or quads to create smart charging lounges, with our optional 4G LTE Wi-Fi Hotspot.
